The Quarterly Economic & Business Activity Report provides a quarterly review and analysis of trends in economic and business activities. It is intended to provide a unique perspective on business investments and market conditions within the State of Nevada. Data contained herein is sourced to the Nevada Secretary of State and other reporting agencies, including the Nevada Department of Employment, Training and Rehabilitation.

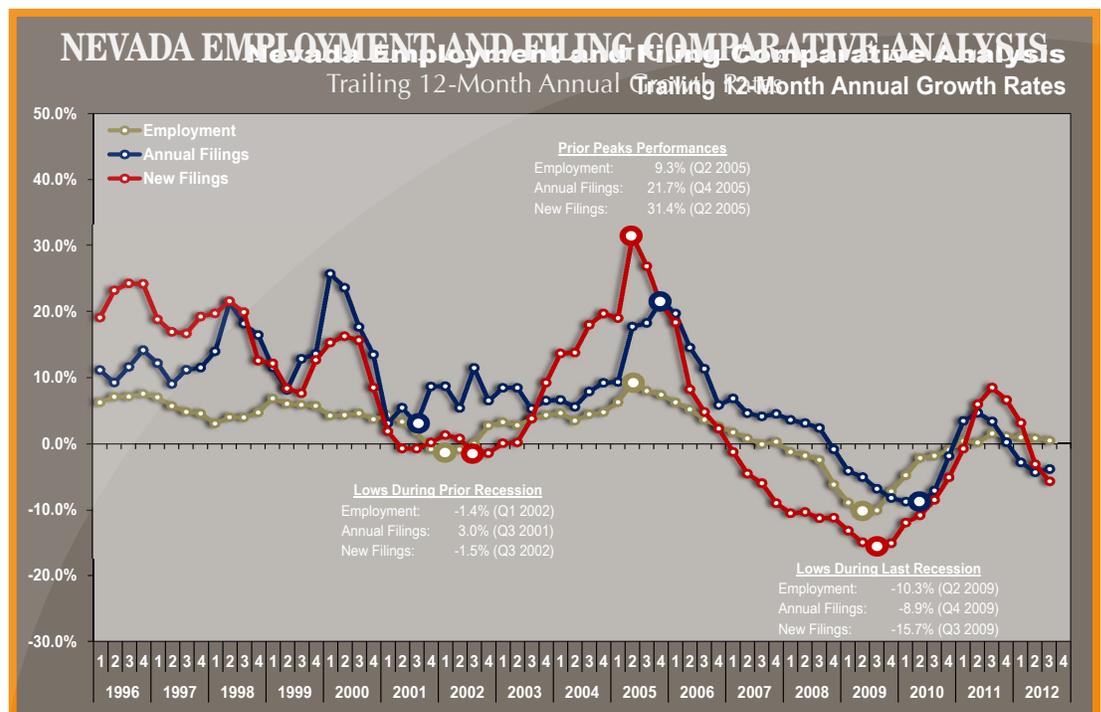

Business Entity Filings Slow Heading into Fiscal Cliff Employment Growth Remains in Positive Territory

New Entity Filings *[Leading Indicator]*

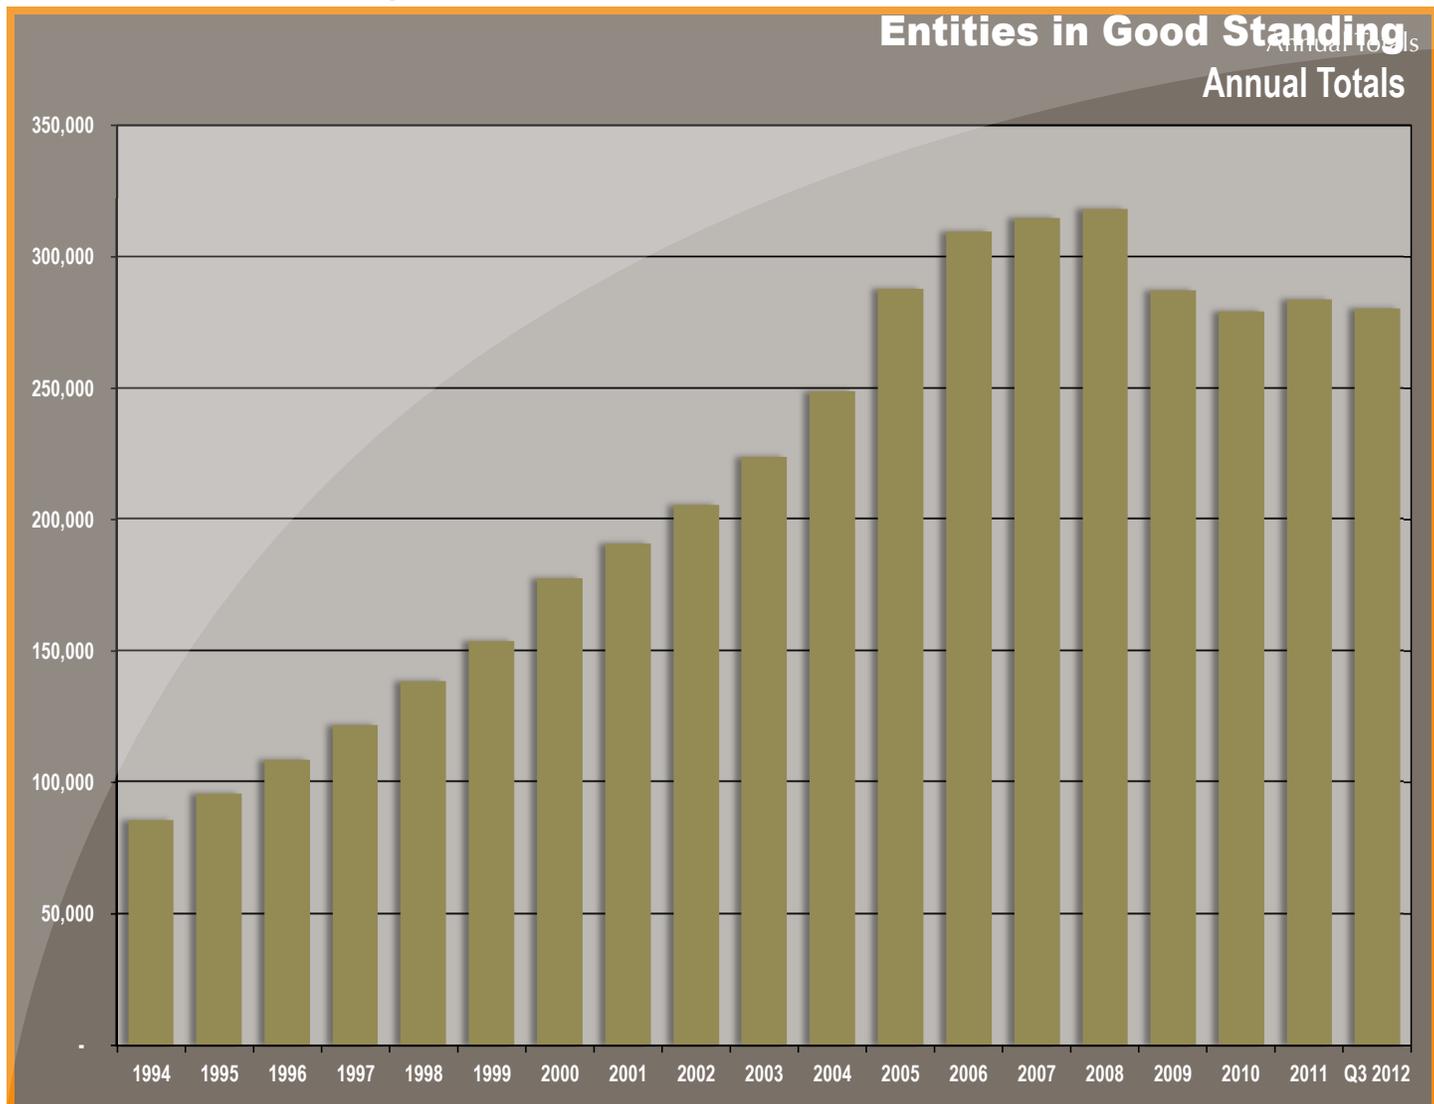

- During the third quarter of 2012, there were 13,081 new business entity filings. Compared to the prior quarter (Q2 2012), new filings declined by 8.4 percent, and they declined by 6.9 percent when compared to the prior year (Q3 2011). In the past four quarters, there have been 56,013 new business filings, down 5.6 percent when compared to the previous year.
- Domestic (Nevada) new filings totaled 12,113 in the third quarter, down 7.6 percent from last year, with Limited Liability Companies ("LLCs") driving much of the decline (-8.8 percent). Limited Partnership ("LP") filings, while a relatively small share of the total, reported the greatest year-over-year decline, falling 39.0 percent to 147.
- Foreign (non-Nevada) new filings increased 2.5 percent year-over-year to 968. Corporations and LLCs represented the majority of foreign filings, with each reporting 474 in the period. Compared to last year, corporation filings fell 7.1 percent, while LLC filings increased 15.6 percent.

Total List Filings *[Lagging Indicator]*

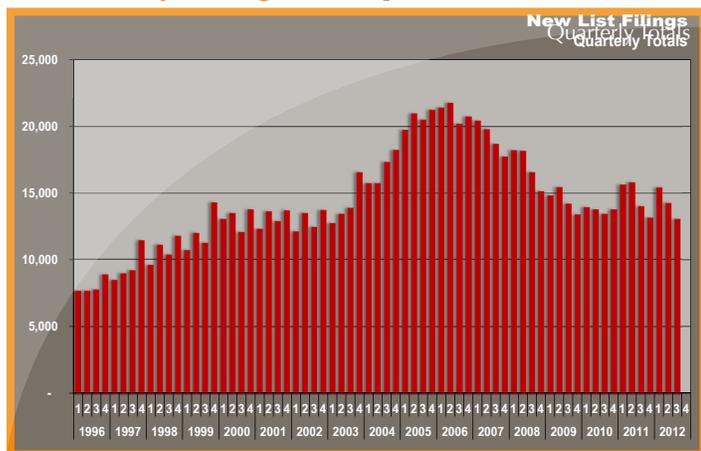

- Initial, annual and amended lists filed during the third quarter of 2012 totaled 67,391, down 8.0 percent from last quarter and off 2.2 percent from last year. LPs reported the greatest year-over-year decline, falling 8.2 percent to 3,099 and Corporation filings fell 4.0 percent to 30,405. The number of LLC filings totaled 33,590, down a modest 0.2 percent on a year-over-year basis.
- A total of 283,941 entities filed lists during the trailing four quarters ending September 2012. Since last year, the total has fallen 3.8 percent. Corporation filings totaled 129,813 for the period, down 5.9 percent from last year, while LLCs fell 1.1 percent to 139,342.
- As of September of 2012, 280,573 entities were considered to be in "good standing", down 1.8 percent from last year.

Ross Miller became the youngest Secretary of State in America and the youngest in Nevada history when he was elected in 2006. Unanimously selected by his peers to serve as President of the National Association of Secretaries of State for 2012, Ross' record of achievement since taking office reflects a true commitment to accountability and results. His accomplishments reflect a combination of enthusiasm for the job, and a vision for serving his constituents.

Analyst's Assessment

“ Economic performance measures within the Nevada economy remain mixed. Sectors that continue to lead the way include education and health services, while the tourism industry builds on momentum from the trough in the latest cycle. Despite improvements in selected areas, others remain challenged, including the hard-hit construction sector and fiscally impacted government sector. With new and annual business entity filings trending in negative territory, the prospects for strengthening employment growth in the coming quarters is somewhat limited. Concerns about business retention statewide are also on the rise.

While overall conditions remain fragile, employment growth has managed to remain in positive territory, business investment is up over the past 12 months, and there is increasing chatter surrounding business relocations. While development activity is a fraction of historical norms, there are some notable casino-hotel and commercial projects moving forward; north and south, urban and rural. As expected, the recovery has been protracted and inconsistent. The looming fiscal cliff and the very real challenges associated with paying back unprecedented levels of individual, corporate and government debt will be the defining factor in the year to come, both nationally and in Nevada. ”

Principal Analyst, Applied Analysis

Domestic (Nevada) Entities vs. Foreign (Non-Nevada) Entities – A domestic entity is an entity created pursuant to Nevada Law that may or may not have nexus in Nevada. Its formation documents are on file and a matter of public record in the office of the Secretary of State. A foreign entity is an entity created pursuant to the laws of a jurisdiction other than Nevada, which is qualified to do business in Nevada. Generally, most foreign entities have some sort of nexus in Nevada because they qualify so they may conduct business in Nevada.

Leading vs. Lagging Indicators – Generally, a lagging indicator is a measurable economic factor that changes after the economy has already begun to follow a particular trend or pattern. A leading indicator is a measurable economic factor that changes before the economy starts to follow a particular trend or pattern. Leading indicators can be used to predict changes in the economy. In this instance, new business entity filings provide directional insight into investments and business formation in the State of Nevada.
